

We Make Reading Fun!

Reading should be fun and easy. Students in the tutoring program will learn by reading at their individual reading levels. Books selected to read are fun and relevant to the child's age and culture.

Some of our daily activities include:

**Read Aloud:** Teachers will read to the students for the first 5-10 minutes of the session. Students will participate with their peers by answering questions and sharing their views.

**Shout Out:** Students will have a chance to "shout out" answers to questions about the reading with their peers.

**Writing:** Students will write their understanding of the reading in their journal.

**Word Works:** Word Works are site words posted on the boards. Students will learn new site words daily to increase their vocabulary.

Scantron's assessment solution helps educators meet NCLB requirements and raise the level of student achievement through a unique combination of standards-based formative assessment and computer-adaptive diagnostic testing. Scantron's solution combines a research-based, content-rich computer adaptive test known as Performance Series and a content-neutral, highly

flexible testing product known as Achievement Series that educators use to develop and administer online and paper-based tests.
